SPECIALIZED EXECUTIVE DBA

HYBRID & ONLINE | PARIS | DUBAI

ÉCOLE DES PONTS BUSINESS SCHOOL

PROF. ALON ROZEN

Rooted in the 280-year legacy of École Nationale des Ponts et Chaussées (ENPC), France's pioneering Grande École founded in 1747 and widely recognized as the world's first civil engineering school, École des Ponts Business School carries forward a tradition of academic excellence, applied research, and impactful innovation. As part of the Institut Polytechnique de Paris, ENPC has long stood for rigor, purpose-driven engineering, and the capacity to turn knowledge into real-world progress, building the infrastructures, institutions, and capabilities that shape economies and societies.

Building on this heritage, École des Ponts Business School was founded in 1987 with a clear ambition: to train managers and leaders who create value not only for organizations, but for society. Under the visionary leadership of Celia Russo, the school launched the first MBA program delivered in English in Paris. A newcomer to France herself, and operating in a male-dominated landscape, Russo challenged the status quo with a groundbreaking, human-centric approach to business leadership—one that emphasized responsibility, impact, and the primacy of people in transformation. That founding spirit continues to guide the school year after year, as we develop leaders equipped to act with clarity, create value responsibly, and lead change with purpose.

PROF. ALON ROZEN

Dean and CEO
École des Ponts Business School

MINISTRY OF CABINET AFFAIRS - PRIME MINISTER'S OFFICE

Welcome to a program shaped by the spirit of ambition, excellence, and future readiness that defines the UAE.

The UAE stands today as a global model of what visionary leadership, unity of purpose, and a steadfast commitment to progress can achieve.

Since its founding, the UAE has pursued a clear national vision: to build a resilient, future-ready nation that places human development, innovation, and prosperity at the center of its advancement.

The UAE has consistently transformed challenges into opportunities and aspirations into achievements. By investing in knowledge, empowering talent, strengthening national capabilities, and fostering a culture of excellence and innovation, the nation has not only kept pace with global change but has positioned itself among the countries shaping the future.

In a world marked by rapid transformation and growing complexity, leaders are defined by the ability to think strategically, lead with agility, collaborate across boundaries, and deliver meaningful impact. The UAE's development journey reflects a deep and enduring belief that investing in people and building capable leaders remains the most powerful driver of sustainable national progress.

This program is designed in that same spirit. It aims to develop a new generation of leaders equipped with the knowledge, accelerated mindset, and practical capabilities required to navigate complexity, drive transformation, and create lasting value for their institutions, communities, and societies.

As you begin this academic journey, you join a learning experience rooted in excellence, inspired by ambition, and committed to shaping the future.

H.E. HUDA AL HASHIMI

Assistant Minister of Cabinet Affairs for
Strategic Affairs

RETECH CENTER

PROF. DR. SAMAN SARBAZVATAN

Responsible Technology Center

Enhancing Today, Enabling Exponential Desirable Futures

ReTech Center explores and contributes to emerging futures in which technology, science, and innovation are responsibly leveraged to enhance humanity and human values, protect and regenerate environmental and sociocultural systems, and create exponential value flows across markets, infrastructures, economies, communities, and ecosystems.

Founded and led by Prof. Saman Sarbazvatan, Vice Dean of École des Ponts Business School, ReTech Center is a multistakeholder platform dedicated to advancing responsible technology as a means of shaping desirable futures for markets, industries, institutions, and societies.

Bridging public and private sector leaders, innovators, investors, experts, academics, scientists, industry actors, and institutional partners across geographies and disciplines, ReTech Center Executive Specialization Tracks extend the core values of Industry 5.0 across functions, markets, infrastructures, and ecosystems, where they encounter the enabling and disruptive forces of digitally empowered responsible transformation.

Through its Executive Specialization Tracks and broader initiatives, ReTech Center helps leaders understand, navigate, and shape the frontiers of responsible innovation, digital transformation, strategy, competitiveness, operations, governance, and value creation. Its approach prepares leaders to design organizations, markets, and ecosystems that are resilient by design, responsible in purpose, and relevant to the exponential desirable futures of business and society.

These Specialization Tracks are explored and developed through ReTech RISE Labs—Research, Innovation, Skills, and Engagement—creating a flywheel effect through which knowledge, innovation, executive capability, and ecosystem engagement continuously reinforce responsible digital transformation.

The Specialized Executive DBA in Government Acceleration

The futures of governance are being designed, researched, theorized, and documented by the practitioners who inhabit them. This SEDBA is designed for senior public sector leaders, policy architects, institutional directors, advisors, and experienced practitioners engaged with the public sector from various angles, who bring decades of expertise to a doctoral framework, and who want to contribute rigorously to the body of knowledge and practice of what accelerated, responsible governance actually means in practice.

Participants develop an original specialized executive doctoral research project anchored in the realities of government acceleration, from institutional design and national mission delivery to digital governance, policy intelligence, and systemic resilience. The research is practice-oriented by design: it draws from lived professional experience, engages with genuine governance challenges, and produces knowledge that can inform institutions, mobilize resources and investments, influence policy, and advance the field across its strategic, operational, and leadership dimensions.

Built alongside the UAE Government Accelerators and grounded in ReTech Center's ecosystemic approach to the intersection of digital and responsible transitions, this SEDBA offers not a theoretical detachment from practice, but a doctoral scaffolding around it, equipping senior leaders to articulate, validate, and extend the frontier of knowledge and practice in government acceleration with the academic rigor their expertise and ambitions deserve.

The SEDBA confers doctoral-level proof of expertise, not as a credential appended to a career, but as a rigorous demonstration that the participant has contributed to the frontier of knowledge and practice in government acceleration, across its institutional, digital, policy, and leadership dimensions, and that their expertise-driven contribution has been tested against the most demanding standards of intellectual accountability of the specialized executive doctoral level.

GOVERNMENT ACCELERATORS - DR. RADHEYA AL HASHMI

The UAE Government Accelerators, part of the UAE Prime Minister Office, was founded on a bold conviction: that governments achieve their greatest impact when they work collaboratively with clarity, urgency, and an unwavering focus on results. Launched in October 2016 as a flagship national initiative, this pioneering model has redefined government sector delivery by transforming strategic priorities into measurable outcomes within accelerated timeframes.

Developed and proven in the UAE, the Government Accelerators introduced a disciplined, execution-driven approach that brings together leadership, delivery teams, and key stakeholders to define challenges with precision, enable collaboration, and deliver tangible results within 100 days or less. Over time, this model has evolved beyond a methodology into a distinguished platform for transformation, capability building, and knowledge exchange at the local, regional, and global levels.

Building on this legacy, this program is designed to prepare leaders who can navigate complexity with confidence, lead with agility and purpose, and translate ambition into meaningful and lasting impact. By combining academic excellence with practical application, the program offers a distinctive learning experience for those committed to shaping the future of governance and public leadership. It is our privilege to welcome you to this important journey, one that reflects the UAE's enduring commitment to innovation, excellence, and leadership in action.

DR. RADHEYA AL HASHMI

Executive Director
Government Accelerator Center
Prime Minister Office

ABOUT UAE GOVERNMENT ACCELERATOR CENTER

Launched in October 2016, the UAE Government Accelerators are a flagship UAE Government initiative designed to move national priorities from ambition to measurable results.

Built around structured acceleration cycles of 100 days or less, GA enables government teams to define priority challenges, test solutions rapidly, remove barriers, and deliver outcomes that matter.

Since its launch, GA has been applied across government and private entities in the UAE, addressing complex challenges in public services, regulation, competitiveness, and quality of life.

Achievements

7,000+ Government & private sectors employees engaged

100+ innovative priority projects implemented

20+ countries and international organizations engaged

Today, GA serves as a platform for collaboration across government & private sector, academia, and civil society, translating ambitious goals into visible, high-impact results.

This proven model forms the practical foundation of the GA Specialized Executive MBA, bringing the learning environment with real-world case studies.

ABOUT THE PROGRAM

The Specialized Executive DBA in Government Acceleration is a doctoral program designed for senior executives working with the public sector in various capacities who envision producing original knowledge that advances the field by structuring their expertise into doctoral research.

The program is organized around a practice-oriented doctoral research project that each participant develops in order to produce an original contribution to the body of knowledge in the field. Grounded in the participant's institutional context and professional domain, the research engages with the emerging knowledge frontiers of government acceleration, from mission-driven delivery, adaptive governance, and digital public infrastructure to anticipatory policy design, systemic resilience, and cross-sector coalitions.

Specialization courses provide the practical, conceptual, and analytical depth needed to engage doctoral inquiry, critical thinking, and original knowledge contribution. Research analysis sessions, individual and group research workshops, and specialized doctoral advisory sessions structure the progression of each participant's research, from question formulation and methodology design through to argument construction and doctoral defense.

The SEDBA confers doctoral-level proof of expertise in government acceleration, not as a detachment from practice, but as its most rigorous extension. Doctoral graduates leave with something a career in government cannot by itself provide: an original, peer-validated contribution to the body of knowledge in a field they have spent their careers building.

PROGRAM FORMAT AND STRUCTURE

	FULLY ONLINE	HYBRID	HYBRID + PARIS FLAGSHIP
CORE COURSES	ONLINE	ONLINE	ONLINE
SPECIALIZATION COURSES	ONLINE	ONLINE	ONLINE
DOCTORAL RESEARCH ADVISORY SESSIONS	ONLINE	ONLINE	ONLINE
RESEARCH ANALYSIS & WRITING LABS	ONLINE	ONLINE	ONLINE
RAWS (RESEARCH ACCELERATION WORKSHOPS)	OPTIONAL / NOT INCLUDED	1 PER YEAR INCLUDED (4 TOTAL)	2 PER YEAR INCLUDED (8 TOTAL)
PARIS RESIDENTIAL MODULES (FLAGSHIP E-DBA)	-	-	ONLINE
PROGRAM DURATION	4 YEARS	4 YEARS	4 YEARS

FULLY ONLINE

All courses, specialization sessions, research analysis labs, research workshops, and doctoral advisory sessions are delivered online. Research Acceleration Workshops (RAWs) are optional and available at additional cost. The most flexible entry point for senior leaders whose roles make travel commitments difficult.

HYBRID FORMAT

All the flexibility of the Online format, with one Research Acceleration Workshop (RAW) per year included and held in-person — four RAWs over the four-year doctoral journey. RAWs are intensive in-person research residencies designed to accelerate doctoral project development, deepen cohort dialogue, and strengthen research supervision at critical moments in the program.

HYBRID + PARIS FLAGSHIP

The full doctoral experience. Includes all online courses and specialization sessions, two RAWs per year included (eight over four years), and access to all Paris Residential Modules of the Flagship Executive DBA program of École des Ponts Business School. Designed for senior leaders who want the deepest engagement with the EPBS doctoral community and the broadest access to in-person research environments, executive cohort exchange, and institutional networks.

PROGRAM SCHEDULE

2027 - 2031 SPECIALIZED EXECUTIVE DBA SCHEDULE

SEDBA Year 1 · (Feb – Nov)
Research Methods & Doctoral Project Design

SEDBA Year 2 · (Jan – Nov)
Transition to Doctoral Candidacy & Supervised Research

SEDBA Year 3 · (Jan – Nov)
Doctoral Research Continuation

SEDBA Year 4 · (Jan – Nov)
Doctoral Project Finalization, Viva Voce & Graduation

SPECIALIZATION MODULES

- 1.** Leading Change and Managing Complexity through Government Acceleration
- 2.** Reinventing Public Administration and Smart Governance
- 3.** Data-Driven Policymaking and Anticipatory Government Services
- 4.** Human-Centered Government Services and Institutional Experience
- 5.** Adaptive and Innovative Government Models
- 6.** Framing Government Missions and Building Acceleration Coalitions
- 7.** Accelerated Government Operations and Institutional Capability Building
- 8.** Government Performance and Impact-Driven Approaches
- 9.** Public Engagement, Communication, and Trust-Building
- 10.** Government Vision, Institutional Identity, and Strategic Positioning
- 11.** Leadership for Acceleration: Decision-Making, Alignment, and Execution
- 12.** Agile Governance and Adaptive Policy Design
- 13.** Future-Ready Public Talent and Institutional Learning
- 14.** Crisis Management and Systemic Resilience in Government Institutions
- 15.** Sustaining and Scaling Acceleration and Ensuring Future Readiness

ReTech Senior Fellow

ADMISSIONS AND REQUIREMENTS

DO YOU HAVE:

- ☐ A Master's, MBA, Executive MBA, or other advanced master's-level professional or academic degree?
- ☐ A minimum of 10 years of full-time work experience at the start of the program, with a considerable amount of experience in a given field?
- ☐ A good level of English?
All courses are conducted in English. Business-level English proficiency is required for doctoral program coursework.
- ☐ The ambition to become a recognized Subject-Matter Expert and thought leader in your present or future domain?
- ☐ The commitment to complete the program, especially designed for busy working professionals, and your thesis (also known as "Doctoral Project") over an average of 4 years?
- ☐ An agile, professional mindset, able to reflect on areas of emerging practice in your industry?

Please note: We are an equal opportunity institution and welcome candidates from all industries, backgrounds, ages, genders and nationalities.

TUITION FEES

	ONLINE	HYBRID	HYBRID+
TUITION	€90,000	€110,000	€130,000

TUITION INCLUDES

- Program tuition for the Specialized Executive Doctorate of Business Administration
- Course materials across all four years
- Online preparatory course pack and any further mandatory online modules
- Access to doctoral research supervision sessions
- Access to Research Analysis & Writing Labs
- RAWs as specified per format (Hybrid: 1/year; Flagship: 2/year)
- Paris Residential Modules as specified per format (Flagship only)
- Access to ReTech Center doctoral community, fellows network, and alumni events
- Course materials on the Learning Management System

TUITION DOES NOT INCLUDE

- Personal learning materials (laptop, recommended or further reading)
- Travel and accommodation costs for RAWs and Residential Modules
- Optional RAWs for Fully Online participants (available at additional cost)

SCHOLARSHIPS

Leadership & Inclusion: Women in Leadership, Senior Leaders.

Global Equity: Emerging Markets, Intergovernmental Organizations.

Purpose-Driven: Non-Profit & Social Enterprises, Environment & Nature.

Excellence & Civic Values: Academic Merit and Civic Engagement.
